2	AI-generated comic illustrations	High	High	Yes
3	User-friendly customization and responsive web interface	High	High	Yes
4	Automatic PDF export and download	High	Medium	Yes

Selected Project Idea

ComicCraft is a web-based AI application that transforms user-provided story prompts into personalized comic stories. It uses Gemini models for structured outlines, narration and dialogue, and Stable Diffusion for comic-style illustrations. The generated panels can be previewed through the web interface and exported as a PDF.
