CUSTOMER JOURNEY MAP

ComicCraft – AI Comic Story Creator using Gemini Models

Date	15 March 2026	**Team ID**	SWTID-2026-3296
Team Size	4	**Project Name**	ComicCraft – AI Comic Story Creator using Gemini Models

Journey Element	Stage 1 – Idea & Input	Stage 2 – AI Comic Generation	Stage 3 – Preview & Export
Actions	• User opens the ComicCraft homepage. • Enters story prompt. • Enters main character name. • Selects setting, tone and art style.	• User submits the form. • Gemini Flash creates a structured 5-panel outline. • Gemini Pro generates narration and dialogue. • Stable Diffusion creates panel illustrations.	• User reviews the comic panel-by-panel. • Checks titles, images, descriptions and narration. • Clicks “Download Your Comic as PDF”. • Receives the exported comic and can create another comic.
Touchpoint	• Web homepage (index.html) • Input form • HTML/CSS/Jinja2 interface	• FastAPI backend • Gemini Flash • Gemini Pro • Stable Diffusion • Comic generation pipeline	• Comic Preview page • PDF export function • Export Success page
Customer Thought	“I have a story idea. I want an easy way to turn it into a comic.” “Can I customize the character, setting and visual style?”	“The AI should understand my prompt and keep the story coherent.” “I want the images and dialogues to match my chosen style.”	“Does the final comic look like what I imagined?” “I want to save, share or print the completed comic.”
Customer Feeling	• Curious • Creative • Excited • Slightly uncertain about the result	• Engaged • Excited • Impressed by AI-generated content • Expectant while generation completes	• Satisfied when the comic matches expectations • Accomplished after export • Motivated to create another comic
Process Ownership	• Frontend / UI team • Team leader and members responsible for input flow and usability	• Backend & AI integration team • Gemini and Stable Diffusion workflow • Generation and layout modules	• Frontend + backend integration team • PDF export and success-flow handling • Testing and verification
Opportunities	• Keep the form simple and intuitive. • Add clearer examples for prompts. • Provide useful style/tone choices. • Validate inputs before generation.	• Improve prompt consistency across panels. • Show generation progress/status. • Add stronger error handling and retry options. • Allow more customization of characters and visual style.	• Provide a polished PDF layout. • Make export confirmation clear. • Add options for creating another comic quickly. • Future enhancement: user profiles and comic libraries.
